

# HOT WATER CLEANING TANK PIPE BURNER - BROWNEllS COMPLETE NATURAL GAS HWCT BURNER

[Gunsmith Tools](#) > [Metal Prep & Coloring](#) > [Metal Bluing](#) > [Pipe Burners & Components](#)

## Saves Gas & Money On Heating Cleaner & Rinse Tanks

For Dicro-Clean 909"! cleaning solutions or hot water rinse tanks, you don't need as much burner capacity as our bluing tank pipe burner delivers. So, to save you gas, and some setup costs, we had these special Hot Water Cleaning Tank Burners designed. They have one row of specially sized and positioned holes in a  $\frac{3}{4}$ " pipe. Includes a mixer head and the gas cock with either LP or Natural Gas orifice. (Don't use on the bluing tank; they won't make enough heat.)

## Attributes

- Name: [BROWNEllS COMPLETE NATURAL GAS HWCT BURNER](#)
- Manufacturer: [BROWNEllS](#)

# Safety Instruction Guide for HOT WATER CLEANING TANK PIPE BURNER

## Introduction

Thank you for choosing the HOT WATER CLEANING TANK PIPE BURNER by Brownells. This guide provides essential safety instructions and information for the safe use of this product. Please read this guide carefully before installation and use to ensure your safety and the proper functioning of the burner.

## General Safety Guidelines

- Ensure that the burner is installed and maintained by qualified personnel.
- Always follow the manufacturer's instructions and safety recommendations.
- Use the burner only for its intended purpose as specified in the product description.
- Keep the burner and its surroundings clean and free from flammable materials.
- Regularly inspect the burner for any signs of damage or wear.
- Ensure proper ventilation when using the burner to avoid the buildup of harmful gases.
- Store the burner in a dry, cool place when not in use.

## Specific Safety Precautions for Use

- Do not use the burner for any applications other than hot water cleaning tanks.
- Ensure that the gas pressure is within the specified range: 11" w.c. for LP gas and 4"6" w.c. for Natural Gas.
- Do not exceed the burner's maximum output of 25,600 BTU.
- Avoid using the burner on a bluing tank, as it will not generate sufficient heat.
- Always check for gas leaks before operating the burner.
- Use appropriate personal protective equipment (PPE) such as gloves and safety goggles when handling gas connections.
- Keep children and pets away from the burner during operation.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure the installation area is wellventilated.
- Connect the burner to the gas supply using the 1/4" NPT pipe thread on the gas cock.
- Ensure the gas cock is compatible with either LP or Natural Gas orifice.
- Secure all connections to prevent gas leaks.
- Install the mixer head according to the manufacturer's instructions.

### 2. Usage:

- Before igniting the burner, ensure that all safety checks have been completed.
- Turn on the gas supply and check for leaks using a soap solution. If bubbles form, there is a leak; turn off the gas and repair before proceeding.
- Light the burner according to the manufacturer's lighting instructions.
- Monitor the burner during operation and adjust the flame as necessary for optimal performance.
- After use, turn off the gas supply and allow the burner to cool before handling.

## **Disposal Instructions**

- Dispose of the burner in accordance with local regulations for hazardous materials.
- Do not dispose of the burner in regular household waste.
- Contact your local waste management authority for guidance on safe disposal methods.

## **Contact Information for Further Support**

For any inquiries regarding safety, installation, or maintenance of the HOT WATER CLEANING TANK PIPE BURNER, please refer to the manufacturer's contact information provided with your product packaging.

By following these safety instructions and guidelines, you can ensure a safe and efficient experience with your HOT WATER CLEANING TANK PIPE BURNER. Thank you for your attention to safety!
