

# HOT WATER CLEANING TANK PIPE BURNER - COMPLETE LP GAS HWCT BURNER

[Gunsmith Tools & Supplies](#) > [Metal Prep & Coloring](#) > [Metal Bluing](#) > [Pipe Burners & Components](#)

## Saves Gas & Money On Heating Cleaner & Rinse Tanks

For Dicro-Clean 909"! cleaning solutions or hot water rinse tanks, you don't need as much burner capacity as our bluing tank pipe burner delivers. So, to save you gas, and some setup costs, we had these special Hot Water Cleaning Tank Burners designed. They have one row of specially sized and positioned holes in a ¾" pipe. Includes a mixer head and the gas cock with either LP or Natural Gas orifice. (Don't use on the bluing tank; they won't make enough heat.)

# **Safety Instruction Guide for HOT WATER CLEANING TANK PIPE BURNER COMPLETE LP GAS HWCT BURNER**

## **Introduction**

Thank you for choosing the HOT WATER CLEANING TANK PIPE BURNER COMPLETE LP GAS HWCT BURNER. This product is designed to provide efficient heating for DicroClean 909" cleaning solutions and hot water rinse tanks. To ensure safe and effective use of this burner, please read and follow the safety instructions outlined in this guide.

## **General Safety Guidelines**

- Always use the burner in accordance with the manufacturer's instructions.
- Ensure that the burner is installed and used in a wellventilated area to prevent the accumulation of gas.
- Regularly inspect the burner and gas connections for any signs of wear or damage.
- Keep flammable materials away from the burner during operation.
- Do not use the burner for any purpose other than its intended use.
- Ensure that children and vulnerable individuals are kept away from the burner during operation.

## **Specific Safety Precautions for Use**

- Use only LP Gas or Natural Gas as specified; do not use any other fuel types.
- Ensure that the gas pressure is within the required range: 11" w.c. for LP Gas and 4"6" w.c. for Natural Gas.
- Do not operate the burner on a bluing tank, as it will not generate sufficient heat.
- Always check for gas leaks before igniting the burner. Use soapy water to check connections; if bubbles form, there is a leak.
- Do not use the burner in enclosed spaces without proper ventilation.
- In case of a gas leak, turn off the gas supply immediately and ventilate the area.

## **Instructions for Installation and Usage**

### **1. Installation**

- Ensure the burner is installed by a qualified professional.
- Connect the burner to the gas supply using a 1/4" NPT pipe thread on the gas cock.
- Position the burner in a stable and secure location that allows for proper ventilation.
- Verify that all connections are tight and secure before proceeding.

### **2. Usage**

- Before igniting the burner, ensure that the area is free of flammable materials.
- Turn on the gas supply and check for leaks as described above.
- Use a long lighter or match to ignite the burner from a safe distance.
- Adjust the flame to the desired height using the gas cock.
- Monitor the burner during operation and never leave it unattended.
- After use, turn off the gas supply and allow the burner to cool down before handling.

## **Disposal Instructions**

- Dispose of the burner and any associated components in accordance with local regulations.
- Do not dispose of the burner in regular household waste.
- Check with local authorities for specific disposal guidelines for gas appliances.

## **Contact Information for Further Support**

For any inquiries or concerns regarding the HOT WATER CLEANING TANK PIPE BURNER, please refer to the manufacturer's contact information provided with the product packaging.

## **Conclusion**

By following these safety instructions, you can ensure the safe and effective use of your HOT WATER CLEANING TANK PIPE BURNER. Always prioritize safety and consult the manufacturer for any further questions or concerns regarding the product. Thank you for choosing our product.
