## INTERCHANGEABLE FUNNEL HEAD FOR 338 CALIBER

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

### Attributes

- Name: [AREA 419 INTERCHANGEABLE FUNNEL HEAD FOR 338 CALIBER](#)
- Manufacturer: [AREA 419](#)
- Product no.: 100029589
- Mfr. No.: 419-FN-HEAD-338
- Caliber: 338 Caliber (.338)
- Delivery weight: 0.011kg
- Shipping height: 16mm
- Shipping width: 76mm
- Shipping length: 146mm
- UPC: 853675008693

# Safety Instruction Guide for AREA 419 Interchangeable Funnel Heads

## Introduction

Thank you for choosing the AREA 419 Interchangeable Funnel Heads. This product is designed to enhance your reloading experience with its caliberspecific functionality. To ensure safe and effective use, please read this safety instruction guide carefully.

## General Safety Guidelines

- Always use the funnel heads as intended and for the specified calibers only.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the funnel heads for any signs of damage before each use. Do not use if damaged.
- Store the funnel heads in a cool, dry place to prevent deterioration.
- Report any unsafe conditions or incidents to the relevant authorities.

## Specific Safety Precautions for Use

- Ensure that the funnel head is securely attached to the funnel before use to prevent spills.
- Avoid using the funnel heads with powders that may generate static electricity, as this can lead to unsafe conditions.
- Do not attempt to modify or repair the funnel heads; doing so may compromise safety and performance.
- Use the funnel heads only with compatible calibers as listed in the product specifications.
- Avoid overfilling the funnel to prevent powder spillage.

## Instructions for Installation and Usage

### 1. Installation of Funnel Head:

- Select the appropriate funnel head for your caliber.
- Thread the funnel head onto the funnel until it is securely fastened.
- Ensure that the head is tightened completely to prevent any kernels from getting stuck.

### 2. Using the Funnel:

- Position the funnel over the reloading case.
- Carefully pour the powder into the funnel, avoiding any rapid movements that could cause spillage.
- Allow the powder to flow freely through the funnel head. If flow is obstructed, stop pouring and check for blockages.

### 3. PostUse Care:

- After use, clean the funnel and funnel head with a soft brush or cloth to remove any residue.
- Store the funnel heads separately in a designated area to prevent mixing with other calibers.

## Disposal Instructions

- Dispose of any damaged funnel heads in accordance with local waste management regulations.
- Do not dispose of the funnel heads in regular household waste if they are made of recyclable materials. Check local guidelines for recycling options.

## **Contact Information for Further Support**

For any safety inquiries or further support regarding the AREA 419 Interchangeable Funnel Heads, please refer to the manufacturer's website or customer service resources provided at the time of purchase.

By following these safety instructions, you can ensure a safe and effective reloading experience with your AREA 419 Interchangeable Funnel Heads. Thank you for your attention to safety!
