

OTB OVERT FRONT PLATE BAG - SPIRITUS SYSTEMS OTB LV-119

FRONT OVERT PLATE BAG (LARGE) - MULTICAM

[Home](#)

OTB OVERT Front Plate Bag The LV/119 System The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear TUBES™ integrations, and different placards. Over The Beach Operations Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The front bag features a 3 Row / 4 Column MOLLE field that doubles as a 6" x 3" Velcro Field. This may be used to attach End User Devices (EUDs), such as those made by KAGWERKS or Juggernaut Defense. The Velcro may be used to mount placards, patches, and IR identifiers. The MOLLE can also be used to mount administrative pouches, frag grenade pouches, or Personal Floatation Devices. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our MOLLE TUBES™ Cummerbund. Placard and Chest Rig Integration. All LV/119 Plate Bags offer placard and chest rig integration via removable 1-Inch ITW NEXUS Buckles. These clips are removable, allowing users to reduce the signature of the plate bag if it is being worn under a cover shirt or being utilized in a low-profile role. The OTB series of products offers a specific OTB Placard that can button into the front bag for added security when jumping into the water. The OTB plate bag is still compatible with our normal placard offerings as well as the Micro Fight Chest Rig Chassis. Push To Talk Support. Each O V E R T front plate bag comes standard with a PTT/Porkchop Loop on either side. Communication Cable Routing. The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs into their design considerations - we endeavor to break that paradigm. The O V E R T front bag offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. It also offers small routing points by the 1-Inch ITW NEXUS buckles on the chest - easily accommodating PTT cable routing. Plate Fitment. The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x

13.25" Extra Large- 11" x 14.00" Thickness - MAXIMUM of 1.20" NOTE: This is a component of a Spiritus Systems LV/119 Plate Carrier build. To build a COMPLETE plate carrier you will need to select AT LEAST ONE of each of these items: Spiritus Systems Front Plate Bag Spiritus Systems Rear Plate Bag Spiritus Systems Shoulder Covers Spiritus Systems Cummerbund Set

OTB OVERT Front Plate Bag Safety Instruction Guide

Introduction

Thank you for choosing the OTB OVERT Front Plate Bag by Spiritus Systems. This guide provides essential safety instructions to ensure the safe use and maintenance of your product. Please read this guide carefully before using the plate bag to maximize your safety and performance.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Regularly inspect the plate bag for any signs of wear, damage, or defects before each use.
- Keep the product away from sharp objects and extreme heat sources to prevent damage.
- Do not exceed the maximum load capacity specified in the product specifications.
- Follow all local laws and regulations regarding the use of tactical gear and equipment.
- Be aware of your surroundings when using the product, especially in crowded or hazardous environments.

Specific Safety Precautions for Use

- **Hydrophobic Mesh Material:** The bag is made from hydrophobic mesh that allows for quick drainage. Ensure that the material is not damaged, as this could affect its performance in wet conditions.
- **Communication Cable Routing:** When routing communication cables, ensure they do not obstruct your movement or create a choking hazard.
- **Plate Fitment:** Ensure that the plates used in the carrier fit within the specified dimensions:
 - Medium: 10" x 12.5"
 - Large: 10.25" x 13.25"
 - Extra Large: 11" x 14.00"
 - Thickness: MAXIMUM of 1.20"
- **Cummerbund and Accessories:** When using cummerbunds or accessories, ensure they are securely attached to avoid detachment during use.
- **Jumping into Water:** If using the OTB Placard for added security while entering water, ensure it is properly secured to prevent loss.

Instructions for Installation and Usage

1. Fitting the Plate:

- Open the front plate bag and insert the appropriate size plate, ensuring it fits snugly.
- Close the bag securely to prevent the plate from shifting during use.

2. Attaching Accessories:

- Use the MOLLE field on the front of the bag to attach pouches, placards, or other accessories.
- Ensure that all attachments are securely fastened and do not impede movement.

3. Adjusting the Cummerbund:

- Attach the cummerbund using the First Spear TUBES™.
- Adjust the fit for comfort and security, ensuring it is not too tight or too loose.

4. Routing Communication Cables:

- Route communication cables through the open shoulders and small routing points provided.
- Ensure cables are secured and do not interfere with movement.

5. Cleaning and Maintenance:

- Rinse the bag with fresh water after use in saltwater or sandy environments to prevent material degradation.
- Allow the bag to dry completely before storing it.

Disposal Instructions

- Dispose of the product in accordance with local regulations for textile and plastic waste.
- Do not burn the product, as it may release harmful substances.

Contact Information for Further Support

For any safety inquiries or concerns regarding your OTB OVERT Front Plate Bag, please refer to the manufacturer's official website or contact the appropriate customer service channels.

Thank you for your attention to these safety instructions. Your safety is our priority, and we hope you enjoy using your OTB OVERT Front Plate Bag.
