

# OTB OVERT FRONT PLATE BAG - OTB LV-119 FRONT OVERT PLATE BAG (X-LARGE) - MULTICAM

[Home](#)

OTB OVERT Front Plate Bag The LV/119 System The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear TUBES™ integrations, and different placards. Over The Beach Operations Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The front bag features a 3 Row / 4 Column MOLLE field that doubles as a 6" x 3" Velcro Field. This may be used to attach End User Devices (EUDs), such as those made by KAGWERKS or Juggernaut Defense. The Velcro may be used to mount placards, patches, and IR identifiers. The MOLLE can also be used to mount administrative pouches, frag grenade pouches, or Personal Floatation Devices. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our MOLLE TUBES™ Cummerbund. Placard and Chest Rig Integration. All LV/119 Plate Bags offer placard and chest rig integration via removable 1-Inch ITW NEXUS Buckles. These clips are removable, allowing users to reduce the signature of the plate bag if it is being worn under a cover shirt or being utilized in a low-profile role. The OTB series of products offers a specific OTB Placard that can button into the front bag for added security when jumping into the water. The OTB plate bag is still compatible with our normal placard offerings as well as the Micro Fight Chest Rig Chassis. Push To Talk Support. Each O V E R T front plate bag comes standard with a PTT/Porkchop Loop on either side. Communication Cable Routing. The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs into their design considerations - we endeavor to break that paradigm. The O V E R T front bag offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. It also offers small routing points by the 1-Inch ITW NEXUS buckles on the chest - easily accommodating PTT cable routing. Plate Fitment. The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x

13.25" Extra Large- 11" x 14.00" Thickness - MAXIMUM of 1.20" NOTE: This is a component of a Spiritus Systems LV/119 Plate Carrier build. To build a COMPLETE plate carrier you will need to select AT LEAST ONE of each of these items: Spiritus Systems Front Plate Bag Spiritus Systems Rear Plate Bag Spiritus Systems Shoulder Covers Spiritus Systems Cummerbund Set

## Attributes

- Name: [OTB LV-119 FRONT OVERT PLATE BAG \(X-LARGE\) - MULTICAM](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101907
- Mfr. No.: PC-FB-MC-XL
- Color: Multi-Cam
- Delivery weight: 0.241kg
- Shipping height: 25mm
- Shipping width: 279mm
- Shipping length: 191mm

# OTB OVERT Front Plate Bag Safety Instruction Guide

## Introduction

Thank you for choosing the OTB OVERT Front Plate Bag. This guide provides essential safety instructions to ensure the safe use and maintenance of your product, in compliance with the EU General Product Safety Regulation (GPSR). Please read this guide carefully before using the product to ensure your safety and the safety of others.

## General Safety Guidelines

- Always inspect the product before use for any signs of damage or wear that may affect its performance.
- Do not use the product if any parts are damaged or missing.
- The product is designed for adult use only. Keep it out of reach of children.
- Ensure that the product is used in accordance with the manufacturer's instructions.
- Be aware of your surroundings and potential hazards when using the product, especially in operational environments.
- Regularly check for updates regarding product recalls or safety information on the EU's Safety Gate platform.

## Specific Safety Precautions for Use

- The OTB OVERT Front Plate Bag is designed for use in seaborne operations. Ensure that you are familiar with its features and limitations before use.
- When using the product in water, ensure that it is securely fastened to avoid accidental detachment.
- Be cautious of sharp objects or rough surfaces that may damage the bag or its components.
- Avoid overloading the bag with excessive weight, as this may affect its performance and safety.
- Ensure that communication cables are routed properly to prevent snagging or entanglement during use.
- If using the product in lowlight conditions, ensure that you have appropriate visibility and identification markers.

## Instructions for Installation and Usage

### 1. Fitting the Plate Bag:

- Ensure that the plate bag is compatible with your body armor plates. The bag accommodates standard SAPI cut plates and other compatible cuts.
- Insert the armor plates into the designated compartments of the bag, ensuring a secure fit.

### 2. Adjusting the Cummerbund:

- Attach the cummerbund using the sewn loops on the sides of the plate bag.
- Adjust the cummerbund for a snug fit, ensuring comfort and mobility.

### 3. Attaching Accessories:

- Utilize the MOLLE field on the front of the bag to attach any accessories, such as pouches or placards.
- Ensure that all attachments are securely fastened and do not obstruct your movement.

### 4. Routing Communication Cables:

- Use the open shoulders and routing points provided to guide communication cables.
- Ensure that cables are secured and do not interfere with your movement or safety.

#### **5. Maintenance and Cleaning:**

- Rinse the bag with fresh water after exposure to saltwater or debris.
- Allow the bag to dry completely before storage.
- Do not use harsh chemicals or abrasive materials for cleaning.

## **Disposal Instructions**

- Dispose of the product in accordance with local regulations regarding textile and plastic waste.
- If the product is no longer usable, consider recycling components where applicable.
- Do not burn the product, as it may release harmful substances.

## **Contact Information for Further Support**

For any inquiries or concerns regarding the OTB OVERT Front Plate Bag, please refer to the manufacturer's website or contact their customer support for assistance.

By following these guidelines, you can ensure a safe and effective experience with your OTB OVERT Front Plate Bag. Thank you for your attention to safety and compliance.
