

OTB OVERT FRONT PLATE BAG - SPIRITUS SYSTEMS OTB LV-119

FRONT OVERT PLATE BAG (LARGE) - COYOTE BORWN

[Home](#)

OTB OVERT Front Plate Bag The LV/119 System The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear TUBES™ integrations, and different placards. Over The Beach Operations Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The front bag features a 3 Row / 4 Column MOLLE field that doubles as a 6" x 3" Velcro Field. This may be used to attach End User Devices (EUDs), such as those made by KAGWERKS or Juggernaut Defense. The Velcro may be used to mount placards, patches, and IR identifiers. The MOLLE can also be used to mount administrative pouches, frag grenade pouches, or Personal Floatation Devices. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our MOLLE TUBES™ Cummerbund. Placard and Chest Rig Integration. All LV/119 Plate Bags offer placard and chest rig integration via removable 1-Inch ITW NEXUS Buckles. These clips are removable, allowing users to reduce the signature of the plate bag if it is being worn under a cover shirt or being utilized in a low-profile role. The OTB series of products offers a specific OTB Placard that can button into the front bag for added security when jumping into the water. The OTB plate bag is still compatible with our normal placard offerings as well as the Micro Fight Chest Rig Chassis. Push To Talk Support. Each O V E R T front plate bag comes standard with a PTT/Porkchop Loop on either side. Communication Cable Routing. The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs in to their design considerations - we endeavor to break that paradigm. The O V E R T front bag offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. It also offers small routing points by the 1-Inch ITW NEXUS buckles on the chest - easily accommodating PTT cable routing. Plate Fitment. The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x

OTB OVERT Front Plate Bag Safety Instruction Guide

Introduction

Thank you for choosing the OTB OVERT Front Plate Bag, part of the LV/119 System by Spiritus Systems. This safety instruction guide is designed to help you understand the safe use, installation, and maintenance of your product. Please read this guide carefully to ensure safe operation and compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Ensure the product is used only for its intended purpose as described in this guide.
- Regularly inspect the plate bag for signs of wear, damage, or deterioration.
- Avoid exposure to extreme temperatures, chemicals, or harsh environments that may compromise the integrity of the materials.
- Keep the product away from open flames or sharp objects to prevent damage.
- Do not exceed the maximum weight capacity of the bag to ensure safe use.
- Always ensure that the plate bag is properly secured when worn to prevent accidental detachment.

Specific Safety Precautions for Use

- When using the plate bag in water or sea environments, ensure that all components are securely fastened to prevent loss.
- Be cautious when using the MOLLE system for attachments; ensure that all items are properly secured to avoid accidental detachment during use.
- Avoid using the plate bag with incompatible accessories that may not be designed for the LV/119 System.
- For users with special needs or vulnerabilities, consult with a qualified professional before use to ensure safety and suitability.

Instructions for Installation and Usage

Installation

1. Prepare the Plate Bag:

- Unpack the OTB OVERT Front Plate Bag and check for any visible damage or missing components.
- Familiarize yourself with the MOLLE field and Velcro areas for attachments.

2. Insert Plates:

- Ensure that the plates used are within the specified fitment dimensions:
 - Medium: 10" x 12.5"
 - Large: 10.25" x 13.25"
 - Extra Large: 11" x 14.00"
 - Thickness: Maximum of 1.20"
- Carefully insert the plates into the designated compartments of the bag.

3. Secure Attachments:

- Use the MOLLE system to attach any additional pouches or accessories as needed.
- Ensure that all attachments are securely fastened.

4. Adjust Cummerbund and Shoulder Straps:

- Adjust the cummerbund and shoulder straps for a snug fit.
- Ensure that the First Spear TUBES™ are properly attached and secure.

Usage

- Always wear the plate bag with the front facing outward.
- Ensure that the communication cable routing is properly managed to avoid entanglement.
- For water operations, ensure that the bag is securely fastened and check the drainage capabilities after use.
- When wearing the plate bag under a cover shirt, ensure that it is adjusted to reduce visibility and bulk.

Disposal Instructions

- Dispose of the OTB OVERT Front Plate Bag responsibly, following local regulations for textile and plastic waste.
- If the product is damaged beyond repair, consider recycling materials where possible.
- Do not dispose of the product in regular household waste if it is still functional; consider donating to local organizations that may benefit from its use.

Contact Information for Further Support

For any safety inquiries or product support, please reach out to the designated contact point provided by your retailer. Always ensure you have your purchase details ready for reference.

Thank you for following these safety instructions. We encourage you to report any unsafe conditions or product concerns to the appropriate authorities. Stay safe and enjoy the enhanced capabilities of your OTB OVERT Front Plate Bag.
