## FRONT OVERT PLATE BAG (X-LARGE) - RANGER GREEN

[Home](#)

OTB OVERT Front Plate Bag The LV/119 System The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear TUBES™ integrations, and different placards. Over The Beach Operations Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such as sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The front bag features a 3 Row / 4 Column MOLLE field that doubles as a 6" x 3" Velcro Field. This may be used to attach End User Devices (EUDs), such as those made by KAGWERKS or Juggernaut Defense. The Velcro may be used to mount placards, patches, and IR identifiers. The MOLLE can also be used to mount administrative pouches, frag grenade pouches, or Personal Floatation Devices. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our MOLLE TUBES™ Cummerbund. Placard and Chest Rig Integration. All LV/119 Plate Bags offer placard and chest rig integration via removable 1-Inch ITW NEXUS Buckles. These clips are removable, allowing users to reduce the signature of the plate bag if it is being worn under a cover shirt or being utilized in a low-profile role. The OTB series of products offers a specific OTB Placard that can button into the front bag for added security when jumping into the water. The OTB plate bag is still compatible with our normal placard offerings as well as the Micro Fight Chest Rig Chassis. Push To Talk Support. Each O V E R T front plate bag comes standard with a PTT/Porkchop Loop on either side. Communication Cable Routing. The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs into their design considerations - we endeavor to break that paradigm. The O V E R T front bag offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. It also offers small routing points by the 1-Inch ITW NEXUS buckles on the chest - easily accommodating PTT cable routing. Plate Fitment. The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x

# OTB OVERT Front Plate Bag Safety Instruction Guide

## Introduction

Thank you for choosing the OTB OVERT Front Plate Bag by Spiritus Systems. This product is designed for use in various operational environments, including Over The Beach (OTB) operations. To ensure your safety and the effective use of this product, please read and follow these safety instructions carefully.

## General Safety Guidelines

- Always inspect the plate bag before use for any signs of wear, damage, or defects.
- Ensure that all components are correctly assembled and securely fastened.
- Do not exceed the specified weight limits for equipment and accessories attached to the plate bag.
- Use the plate bag only for its intended purpose and in accordance with the manufacturer's instructions.
- Keep the plate bag away from sharp objects, fire, and extreme heat to prevent damage.
- Regularly check for updates on product recalls or safety notices through the EU's Safety Gate platform.

## Specific Safety Precautions for Use

- The OTB OVERT Front Plate Bag is designed to fit United States Standard Issue SAPI cut plates. Ensure that your plates conform to the following dimensions:
  - Medium 10" x 12.5"
  - Large 10.25" x 13.25"
  - Extra Large 11" x 14.00"
  - Thickness MAXIMUM of 1.20"
- Do not use plates that exceed the specified measurements, as this may compromise the safety and functionality of the plate bag.
- The product is made from hydrophobic mesh material that allows for quick drainage. However, ensure that it is dried properly after exposure to water to prevent mold or mildew.
- Be cautious when using the PTT/Porkchop Loop for communication devices. Ensure cables are routed properly to avoid snagging or damage.
- Always secure any accessories or attachments using the provided MOLLE fields and Velcro to prevent accidental detachment during use.

## Instructions for Installation and Usage

### 1. Fitting the Plate:

- Open the front of the plate bag.
- Insert the appropriate SAPI cut plate into the designated compartment.
- Ensure that the plate is positioned securely and that the compartment is closed properly.

### 2. Attaching Accessories:

- Utilize the MOLLE fields on the front of the bag for attaching pouches, placards, or other accessories.
- Ensure that Velcro attachments are firmly pressed to secure them in place.

### 3. Using the Cummerbund:

- Attach the First Spear TUBES™ to the sewn loops on the sides of the plate bag.
- Adjust the cummerbund for a snug fit, ensuring comfort and mobility.

#### **4. Communication Setup:**

- If using a communication device, route the cable through the open shoulders of the plate bag.
- Ensure that the cable is positioned to avoid interference with movement.

#### **5. PostOperation Care:**

- After use, rinse the plate bag with fresh water to remove salt and debris.
- Allow the bag to air dry completely before storage.

## **Disposal Instructions**

- Dispose of the plate bag in accordance with local regulations regarding textile and plastic waste.
- If the product is damaged beyond repair, ensure that it is disposed of in a manner that prevents any potential hazards to the environment or others.

## **Contact Information for Further Support**

For any inquiries or further assistance regarding the OTB OVERT Front Plate Bag, please refer to the manufacturer's website or customer service resources available to you.

Thank you for following these safety instructions. Your safety and satisfaction are our top priorities.
