One of the most critical components on your AR-15 is the charging handle, since it gives you complete control over your gun's firing status. Because of that, you need a charging handle that's easy to use and durable, and Aero Precision has the perfect option in the form of its Breach Ambidextrous Charging Handle. The larger of the two levers gives you more surface area for instant, easy activation of the lever, whether through rapid one-handed racking or other motions. The Aero Precision Breach Charging Handle is machined from 7075 aluminum and is treated with a hardcoat-anodized finish. Like all of Aero's products, this handle is made right here in the USA.
