

ULTRA™ MICROMETER SEATER DIES - FORSTER PRODUCTS, INC.

284 SHEHANE MICROMETER SEATER DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Forster Reloading Dies are of excellent quality and provide the reloader with the ability to produce concentric rounds time and time again. Each die is manufactured from the finest quality steel carefully machined to very tight tolerances. Dies are hand polished both before and after the heat-treating process to guarantee an extra fine finish. All Forster reloading dies feature their Forster Cross Bolt Die Locking Ring that tightens the two ends of the split ring instead of tightening a screw directly into the threads of the die. The Forster Ultra Seater includes all of the features of the Forster Bench Rest Seater Die above, plus an ultra accurate micrometer adjustment. This micrometer adjustment allows you to adjust bullet seating depth from .0005 inch to .001 inch increments, and makes switching bullets easy - just dial back to your previous recorded setting. Forster Ultra Seaters make fine tuning your bullets to the lands of your rifling simple.

Attributes

- Name: [FORSTER PRODUCTS, INC. 284 SHEHANE MICROMETER SEATER DIE](#)

ULTRA™ MICROMETER SEATER DIES SAFETY INSTRUCTION GUIDE

Introduction

Thank you for choosing the ULTRA™ MICROMETER SEATER DIES by Forster Products, Inc. This guide provides important safety instructions to ensure the safe and effective use of your reloading dies. Please read and follow these guidelines carefully.

General Safety Guidelines

- Ensure safe use of the ULTRA™ MICROMETER SEATER DIES by following the instructions provided.
- Be aware of potential hazards associated with reloading equipment.
- Use the product only for its intended purpose.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check for product recalls or safety updates through the EU Safety Gate platform.

Specific Safety Precautions for Use

- Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves, when using reloading dies.
- Ensure your reloading workspace is clean, wellventilated, and free from distractions.
- Do not exceed the maximum specifications for the reloading dies as indicated in the product manual.
- Handle all components with care to avoid injury or damage.
- Always doublecheck your measurements and settings before proceeding with reloading.
- If you notice any damage to the dies, discontinue use and contact support for assistance.

Instructions for Installation and Usage

1. Installation:

- Secure the die in your reloading press according to the manufacturer's instructions.
- Ensure that the die is properly aligned and tightened to avoid movement during operation.
- Check that the Forster Cross Bolt Die Locking Ring is securely fastened to prevent loosening.

2. Usage:

- Set the micrometer adjustment to your desired bullet seating depth. Adjust in increments of .0005 inch to .001 inch for precision.
- Load the bullet into the die and operate the reloading press according to standard reloading practices.
- After seating the bullet, check the seating depth with a caliper to ensure accuracy.
- If switching bullet types, return the micrometer setting to your previously recorded depth for consistency.

Disposal Instructions

- Dispose of any used or damaged reloading dies in accordance with local regulations.
- Do not dispose of reloading components or packaging in regular household waste.
- Check with local recycling centers for proper disposal methods for metal and plastic materials.

Contact Information for Further Support

For any questions or concerns regarding the ULTRA™ MICROMETER SEATER DIES, please refer to the manufacturer's contact information provided on the product packaging or visit the official website.

By following these safety instructions, you can ensure a safe and effective reloading experience with your ULTRA™ MICROMETER SEATER DIES. Thank you for your commitment to safety and quality in your reloading practices.
