

2 CAVITY PISTOL BULLET MOLDS - LEE PRECISION 9MM (0.356") 124GR TRUNCATED CONE DOUBLE CAVITY MOLD

[Reloading](#) > [Bullet Casting](#) > [Casting Moulds](#) > [Handgun Moulds](#)

All molds for pistol calibers are double cavity to speed casting. All Lee mould blocks are made from aluminum because of the exceptional moulding qualities. The mould cavities are CNC machined for unmatched roundness and size control. Most bullets from Lee moulds can be used as cast without sizing. Handles and sprue plate are included.

Attributes

- Name: [LEE PRECISION 9MM \(0.356"\) 124GR TRUNCATED CONE DOUBLE CAVITY MOLD](#)
- Manufacturer: [LEE PRECISION](#)
- Product no.: 430108468
- Mfr. No.: 90238
- Bullet Style: Truncated Cone
- Bullet Weight (Grains): 124
- Caliber: 9mm
- Cavities: 2
- Diameter (in): 0.356
- Delivery weight: 0.396kg
- Shipping height: 51mm
- Shipping width: 66mm
- Shipping length: 269mm
- UPC: 734307902384

Safety Instruction Guide for 2 Cavity Pistol Bullet Molds

Introduction

Thank you for choosing the 2 Cavity Pistol Bullet Molds by Lee Precision. This guide provides essential safety instructions to ensure the safe use of this product. Please read and follow these guidelines carefully to avoid potential hazards and ensure a safe casting experience.

General Safety Guidelines

- Always use the bullet molds in a wellventilated area to avoid inhaling fumes.
- Wear appropriate personal protective equipment (PPE), including safety goggles, gloves, and a dust mask, to protect against potential hazards.
- Keep the molds out of reach of children and pets to prevent accidental injury.
- Follow local regulations regarding the use and storage of casting materials and equipment.
- Regularly inspect the molds for signs of damage or wear before each use.

Specific Safety Precautions for Use

- Ensure that the mold is clean and free from debris before use to prevent contamination of the bullets.
- Use only recommended casting alloys to avoid chemical reactions or damage to the mold.
- Do not exceed the manufacturer's recommended temperature limits when melting lead or other materials.
- Avoid pouring molten metal directly into the mold; use a ladle to minimize splashing.
- Allow the molds to cool down before handling to prevent burns or injuries.
- Store the molds in a dry and safe location to prevent corrosion or damage.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary equipment and materials, including the bullet mold, casting alloy, ladle, and protective gear.
- Ensure your workspace is clean and organized.

2. Preheating the Mold:

- Before casting, preheat the mold by placing it on a heat source for a few minutes to ensure even heat distribution.

3. Casting Process:

- Melt the casting alloy according to the manufacturer's instructions.
- Carefully pour the molten metal into the mold cavities using a ladle, filling them to the recommended level.
- Allow the bullets to cool and solidify in the mold for the recommended time.

4. Removing the Bullets:

- Once cooled, open the mold carefully and remove the bullets. Use caution to avoid damaging the mold or the bullets.

5. Cleaning and Maintenance:

- Clean the mold after each use to prevent buildup of residues.
- Store the mold in a cool, dry place, ensuring it is free from moisture.

Disposal Instructions

- Dispose of any waste materials, including sprue and excess casting alloy, in accordance with local regulations.
- Do not dispose of lead or other metals in regular trash; follow specific guidelines for hazardous waste disposal.

Contact Information for Further Support

For any safety inquiries or concerns regarding the 2 Cavity Pistol Bullet Molds, please refer to the manufacturer's contact information provided on the packaging or product documentation.

Thank you for your attention to these safety guidelines. Your safety is our top priority. Enjoy your casting experience!
