

TYPE S BUSHING NECK DIES - REDDING TYPE S BUSHING NECK DIE 260 REM

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Type S Bushing Neck Die provides reloaders with a simple means to precisely control case neck size and tension. Uses interchangeable sizing bushing available in .001" increments The adjustable decapping rod allows positioning the bushing to resize only a portion of the neck length if desired. Concentricity is enhanced by the ability of the resizing bushing to self-center on the case neck. The decapping rod is supplied with a standard size button. This is especially useful for reloaders who are using commercial brass as is. A decapping pin retainer is also supplied with most Type S Bushing Dies except 17 and 20 Caliber This enables neck sizing without the use of the size button for those who sort and/or turn case necks for uniformity.

Safety Instruction Guide for TYPE S BUSHING NECK DIES REDDING TYPE S BUSHING NECK DIE 260 REM

Introduction

Thank you for choosing the TYPE S BUSHING NECK DIES from REDDING. This guide provides essential safety instructions and usage information to ensure safe and effective use of your reloading equipment. Please read this guide carefully before using the product.

General Safety Guidelines

- Always handle all reloading equipment with care to prevent accidents.
- Ensure that the workspace is clean, welllit, and free from distractions.
- Keep all reloading components, including dies, tools, and ammunition, out of reach of children and unauthorized users.
- Regularly inspect your equipment for wear or damage before use.
- Follow all local laws and regulations regarding reloading and ammunition.
- Do not exceed the recommended load specifications for your equipment.

Specific Safety Precautions for Use

- Use the Type S Bushing Neck Die only with the appropriate cartridge (260 Remington).
- Ensure that the sizing bushing is correctly installed before resizing cases.
- Do not attempt to resize cases that are excessively damaged or deformed.
- Always wear safety glasses when operating reloading equipment to protect against potential debris or accidents.
- Avoid wearing loose clothing or jewelry that may get caught in the equipment.
- If you experience any unusual resistance while resizing, stop immediately and inspect the equipment and cases for issues.

Instructions for Installation and Usage

1. Installation of the Die:

- Ensure the reloading press is securely mounted.
- Insert the Type S Bushing Neck Die into the press and tighten it according to the manufacturer's instructions.
- Select the appropriate sizing bushing for your desired neck tension and install it into the die.

2. Preparing Cases:

- Clean and inspect all cases before resizing.
- Ensure that the cases are free from dirt, debris, and any obstructions.

3. Resizing Process:

- Adjust the decapping rod to the desired position based on the neck length you wish to resize.
- Place the case into the shell holder and engage the press handle to resize the neck.
- Monitor the process closely and ensure that the bushing is selfcentering on the case neck.

4. PostResizing:

- After resizing, visually inspect the case neck for uniformity and proper tension.
- Store resized cases in a safe and organized manner.

Disposal Instructions

- Dispose of any damaged or unusable reloading components in accordance with local regulations.
- Recycle materials whenever possible, including brass cases and packaging materials.

Contact Information for Further Support

For any questions or concerns regarding the use of the TYPE S BUSHING NECK DIES, please refer to the manufacturer's contact information provided with your product packaging.

Conclusion

By following these guidelines, you can ensure a safe and effective reloading experience with your TYPE S BUSHING NECK DIES. Always prioritize safety and adhere to best practices for reloading. Thank you for your attention to these important safety instructions.
