

# MEC POWDER BUSHINGS - #37 POWDER BUSHING

[Reloading](#) > [Reloading Presses](#) > [Reloading Press Accessories](#)

We stock a variety of the MEC powder bushings. Each bushing holds a unique volume enabling you to adjust the powder load for your rounds. It is always recommended to use a scale to check powder weights for accuracy. We offer individual bushings in #7 thru #13 and #16 thru #38. Please refer to the MEC website for powder charts that will give you a recommended bushing and start point for your specific powder at [www.mecreloaders.com](http://www.mecreloaders.com)

# MEC Powder Bushings #37 Safety Instruction Guide

## Introduction

Thank you for choosing the MEC Powder Bushings #37. This guide provides important safety instructions and guidelines to ensure safe usage of the product. Please read this document carefully before using the powder bushing to understand how to operate it safely and effectively.

## General Safety Guidelines

- Ensure that the product is used only for its intended purpose, which is to adjust powder loads for reloading ammunition.
- Always use a scale to check powder weights for accuracy to avoid overloading or underloading your rounds.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the powder bushing for any signs of damage or wear. Do not use if damaged.
- Follow all local laws and regulations regarding the reloading of ammunition.

## Specific Safety Precautions for Use

- Handle the powder bushing with care to avoid any injuries.
- Do not attempt to modify or alter the powder bushing in any way.
- Use the powder bushing in a wellventilated area to minimize exposure to powder dust.
- Wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, when handling powder and during the reloading process.
- Always store powder bushings in a cool, dry place away from direct sunlight and heat sources.

## Instructions for Installation and Usage

### 1. Preparation

- Gather all necessary materials, including the MEC Powder Bushing #37, scale, and powder.
- Ensure your reloading press is set up according to the manufacturer's instructions.

### 2. Installation

- Carefully insert the MEC Powder Bushing #37 into the designated slot on your reloading press.
- Ensure that the bushing is securely in place and properly aligned.

### 3. Usage

- Measure the desired amount of powder using the scale.
- Adjust the powder load by selecting the appropriate bushing based on the powder chart available on the MEC website.
- Place the bushing in the press and begin the reloading process.
- After each use, remove the bushing and clean it to prevent powder residue buildup.

### 4. PostUse Care

- Store the powder bushing in a safe location when not in use.
- Regularly check the bushing for wear and replace it if necessary.

## Disposal Instructions

- Dispose of any defective or damaged powder bushings according to local regulations.
- Do not throw the product in regular household waste. Instead, contact your local waste management authority for proper disposal methods.

## Contact Information for Further Support

For any safety inquiries or concerns regarding the MEC Powder Bushings #37, please refer to the MEC website or contact the appropriate local authorities for assistance.

## Conclusion

By following these safety instructions and guidelines, you can ensure a safe and effective reloading experience with the MEC Powder Bushings #37. Always prioritize safety and stay informed about any updates related to the product. Thank you for your attention to these important safety measures.
