

STANDARD BULLET SEATING MICROMETERS - REDDING #5

STANDARD BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

Safety Instruction Guide for STANDARD BULLET SEATING MICROMETERS REDDING #5

Introduction

Thank you for choosing the Redding #5 Standard Bullet Seating Micrometer. This guide provides essential safety instructions to ensure the safe use of this product. Please read this manual thoroughly before use to understand the proper handling and precautions necessary for your safety.

General Safety Guidelines

- Ensure that this product is used only for its intended purpose as outlined in this guide.
- Always handle the micrometer and related equipment with care to avoid injury.
- Keep the micrometer and all reloading equipment out of reach of children and vulnerable individuals.
- Regularly inspect the micrometer for any signs of wear or damage before use.
- Report any unsafe conditions or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including safety glasses, when using this product.
- Do not use the micrometer in wet or damp conditions to prevent electrical hazards.
- Ensure that all components are properly secured before making any adjustments.
- Do not exceed the recommended bullet seating depths to avoid misfires or other dangerous situations.
- Be aware of your surroundings and ensure that no one is in close proximity while using the micrometer.

Instructions for Installation and Usage

Installation

1. Identify the current seating die and ensure it is compatible with the Redding #5 Micrometer.
2. Match the number on your current seating plug to the corresponding micrometer number for proper installation.
3. Carefully remove the existing seating plug from the seating die.
4. Install the Redding #5 Micrometer by screwing it into the die using the 1/220 threads until secure.

Usage

1. Adjust the micrometer to the desired bullet seating depth using the calibrated scale.
2. Insert the bullet into the seating die and gently lower the seating plug to make contact.
3. Apply consistent pressure to seat the bullet to the desired depth.
4. After seating, inspect the bullet to ensure it is seated correctly.
5. Repeat the process for additional bullets, adjusting the micrometer as necessary for consistent results.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding electronic waste and metal components.
- Do not dispose of the micrometer with regular household waste.
- Contact your local waste management authority for specific disposal guidelines.

Contact Information for Further Support

For any inquiries or concerns regarding the safety and use of the Redding #5 Standard Bullet Seating

Micrometer, please reach out to the designated contact point provided with your product. Ensure you have the product details ready for a more efficient support experience.

Thank you for your attention to these safety instructions. Your safety is our priority, and we hope you enjoy using the Redding #5 Standard Bullet Seating Micrometer for your reloading needs.
