

STANDARD BULLET SEATING MICROMETERS - REDDING #15

STANDARD BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

Safety Instruction Guide for Redding #15 Standard Bullet Seating Micrometer

Introduction

Thank you for choosing the Redding #15 Standard Bullet Seating Micrometer. This product is designed to enhance the precision of bullet seating for handloaders. To ensure safe and effective use, please read this safety instruction guide thoroughly.

General Safety Guidelines

- **Product Safety:** Ensure safe use of the micrometer by following all instructions provided. This product is designed to minimize risks associated with bullet seating.
- **Enhanced Recalls:** Stay informed about product recalls. If a recall occurs, follow the instructions provided for safe return or remedy.
- **Online Shopping Protection:** If purchased online, ensure that the platform complies with safety requirements. Verify the seller's reputation.
- **Special Consumer Focus:** This product is intended for adult users. Keep it out of reach of children to prevent accidental misuse.
- **EU Contact Point:** For safety inquiries, refer to the contact information provided by your retailer or manufacturer.
- **Rapid Alerts:** Monitor the EU's Safety Gate platform for updates on any unsafe products.

Specific Safety Precautions for Use

- **Personal Protective Equipment:** Always wear safety glasses and gloves when working with reloading equipment.
- **Check Compatibility:** Ensure that the micrometer is compatible with your existing seating die before use.
- **Avoid OverTightening:** Do not overtighten the micrometer when adjusting seating depth to prevent damage to the die or micrometer.
- **Inspect Regularly:** Regularly inspect the micrometer for wear or damage. Replace if necessary.
- **Use in a WellVentilated Area:** Ensure adequate ventilation when reloading to minimize exposure to any potentially harmful substances.

Instructions for Installation and Usage

1. Installation:

- Remove the existing seating plug from your seating die.
- Match the number on your current seating plug to the corresponding number on the bullet seating micrometer.
- Carefully screw the micrometer into the seating die, ensuring it is securely fastened but not overtightened.

2. Usage:

- Adjust the micrometer to the desired bullet seating depth by rotating the dial.
- Use a caliper to measure the depth and ensure accuracy.
- After adjusting, perform a test seating with a dummy round to verify the settings.
- Once satisfied with the depth, proceed with actual reloading.

Disposal Instructions

- Dispose of the micrometer responsibly. If the product is damaged or no longer usable, follow local regulations for electronic waste disposal.
- Do not dispose of the micrometer in regular household waste. Check for recycling programs in your area.

Contact Information for Further Support

For any questions regarding the Redding #15 Standard Bullet Seating Micrometer, please consult the retailer where you purchased the product or refer to the manufacturer's website for further assistance.

By following these safety instructions, you can ensure a safe and effective experience with your Redding #15 Standard Bullet Seating Micrometer. Thank you for prioritizing safety in your reloading practices.
