

# STANDARD BULLET SEATING MICROMETERS - #16 STANDARD BULLET SEATING MICROMETER

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

# Safety Instruction Guide for STANDARD BULLET SEATING MICROMETERS #16

## Introduction

Thank you for choosing the STANDARD BULLET SEATING MICROMETERS #16. This product is designed to enhance your reloading experience by providing precision and accuracy in bullet seating. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

## General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Always follow the manufacturer's instructions when using the product.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the product for any signs of wear or damage before use.
- If you notice any defects or malfunctions, discontinue use immediately and contact the manufacturer.

## Specific Safety Precautions for Use

- Always wear appropriate safety gear, including eye protection, when using reloading equipment.
- Ensure that the workspace is clean and free from distractions to prevent accidents.
- Use the micrometer in a welllit area to ensure visibility during adjustments.
- Do not force the micrometer beyond its designed limits, as this may cause damage or inaccurate measurements.
- Store the micrometer in a safe place when not in use to prevent damage.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure that your seating die is compatible with the micrometer. The micrometer is designed for dies that use a seat plug with 1/220 threads.
- Remove the existing seating plug from your die.
- Match the number on your current seating plug to the corresponding bullet seating micrometer number.
- Carefully screw the micrometer seating plug into the die until it is securely in place.

### 2. Usage:

- Adjust the micrometer to set the desired bullet seating depth. Ensure that the adjustment is made smoothly to avoid stripping the threads.
- Place the bullet into the die and lower the ram of your reloading press to seat the bullet.
- After seating, measure the bullet seating depth to ensure it meets your specifications.
- Repeat the process as necessary to achieve consistent results.

## Disposal Instructions

- Dispose of the product in accordance with local regulations.
- Do not dispose of the product in regular household waste.
- If the product is damaged or worn, consider recycling options where available.

## Contact Information for Further Support

For any safety inquiries or additional support, please refer to the manufacturer's contact information provided with the product packaging or visit the manufacturer's official website.

Please remember to stay informed about any recalls or safety alerts related to this product by checking the EU's Safety Gate platform regularly. Your safety is our priority. Thank you for your attention to these important safety guidelines.
