

# STANDARD BULLET SEATING MICROMETERS - #32 STANDARD BULLET SEATING MICROMETER

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

# Safety Instruction Guide for STANDARD BULLET SEATING MICROMETERS #32

## Introduction

Thank you for choosing the STANDARD BULLET SEATING MICROMETERS #32. This product is designed to provide precision and accuracy in bullet seating for handloaders. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

## General Safety Guidelines

- Ensure that this product is used only for its intended purpose.
- Always wear appropriate safety gear, including eye protection, when using this product.
- Keep this product out of reach of children and vulnerable individuals.
- Regularly inspect the product for any signs of damage or wear before use.
- If you notice any irregularities or defects, discontinue use immediately and seek assistance.

## Specific Safety Precautions for Use

- Do not exceed the recommended bullet seating depths to avoid potential malfunctions or accidents.
- Ensure that the seating die is securely attached to the reloading press before use.
- Avoid using this product in wet or damp conditions to prevent electrical hazards, if applicable.
- Be aware of your surroundings and ensure that no distractions are present while operating this product.
- Follow all manufacturer guidelines for the specific reloading equipment you are using in conjunction with this product.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure the reloading press is turned off and unplugged (if applicable).
- Remove the existing seating plug from your seating die by unscrewing it counterclockwise.
- Match the number on your current seating plug with the corresponding bullet seating micrometer number.
- Screw the bullet seating micrometer into the seating die using a clockwise motion until secure.
- Check that the micrometer is properly aligned before proceeding.

### 2. Usage:

- Set the desired bullet seating depth by adjusting the micrometer dial.
- Place a bullet into the casing and insert it into the seating die.
- Apply steady pressure to the handle of the reloading press to seat the bullet.
- Regularly check the seating depth to ensure consistency and accuracy.
- After completing your reloading session, carefully remove the bullet seating micrometer from the seating die.

## Disposal Instructions

- Dispose of any packaging materials in accordance with local waste disposal regulations.
- If the product is damaged or no longer in use, dispose of it responsibly at a designated electronic waste facility or recycling center.
- Ensure that all components are disposed of in a manner that does not pose a risk to the environment or public safety.

## Contact Information for Further Support

For any safety inquiries or concerns regarding the STANDARD BULLET SEATING MICROMETERS #32, please reach out to the manufacturer or a qualified professional. Always ensure you have the latest information regarding recalls or safety updates by checking the appropriate channels.

By following these safety guidelines and instructions, you can ensure a safe and effective experience with your STANDARD BULLET SEATING MICROMETERS #32. Thank you for your attention to safety.
