

STANDARD BULLET SEATING MICROMETERS - REDDING #32

STANDARD BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

Safety Instructions for Redding Standard Bullet Seating Micrometers

Introduction

Thank you for choosing the Redding Standard Bullet Seating Micrometer. This guide provides essential safety instructions and usage information to ensure your safety and the effective operation of the product. Please read this guide carefully before using the micrometer.

General Safety Guidelines

- Ensure that the micrometer is used only for its intended purpose as specified in this guide.
- Always handle the micrometer with care to avoid damage.
- Keep the micrometer out of reach of children and vulnerable individuals.
- Regularly inspect the micrometer for any signs of wear or damage before use.
- If you notice any defects or issues, discontinue use immediately and contact support for assistance.
- Report any unsafe conditions or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including safety glasses, when using the micrometer.
- Ensure that the work area is clean and free from clutter to prevent accidents.
- Avoid using the micrometer in wet or damp conditions to prevent electrical hazards.
- Do not attempt to modify or alter the micrometer in any way.
- Use the micrometer only with compatible seating dies that meet the specified thread requirements ($\frac{1}{2}$ 20 threads).
- Ensure that the seating die is securely fastened before making any adjustments with the micrometer.
- Never exceed the recommended bullet seating depths to avoid potential safety hazards.

Instructions for Installation and Usage

1. Installation:

- Ensure that the seating die is clean and free from debris.
- Remove the existing seat plug from the seating die.
- Match the number on your current seating plug with the corresponding bullet seating micrometer number.
- Carefully screw the micrometer into the seating die, ensuring it is securely attached.
- Verify that the micrometer is properly aligned and functioning before use.

2. Usage:

- Adjust the micrometer to the desired bullet seating depth by turning the adjustment knob.
- Place the bullet into the seating die and gently lower the ram to seat the bullet.
- Check the seating depth using the micrometer to ensure it meets your specifications.
- Repeat the process as necessary for additional rounds, ensuring consistency in seating depth.

Disposal Instructions

- Dispose of the micrometer and any associated components in accordance with local regulations.
- Do not dispose of the micrometer in regular household waste.
- Check for any specific disposal instructions from your local waste management authority.

Contact Information for Further Support

For any questions or concerns regarding the use of the Redding Standard Bullet Seating Micrometer, please refer to the manufacturer's website or contact their customer support for assistance.

Thank you for your attention to these safety instructions. Your safety and satisfaction are our top priorities.
