

# MEC POWDER BUSHINGS - MEC RELOADING #7 POWDER BUSHING

[Reloading](#) > [Reloading Presses](#) > [Reloading Press Accessories](#)

We stock a variety of the MEC powder bushings. Each bushing holds a unique volume enabling you to adjust the powder load for your rounds. It is always recommended to use a scale to check powder weights for accuracy. We offer individual bushings in #7 thru #13 and #16 thru #38. Please refer to the MEC website for powder charts that will give you a recommended bushing and start point for your specific powder at [www.mecreloaders.com](http://www.mecreloaders.com)

# MEC Powder Bushings Safety Instruction Guide

## Introduction

Thank you for choosing MEC Powder Bushings. These bushings are designed to help you adjust the powder load for your reloading needs. This guide provides essential safety instructions to ensure safe and effective use of our products in compliance with the EU General Product Safety Regulation (GPSR).

## General Safety Guidelines

- Always ensure that your work area is clean and free from distractions.
- Keep all reloading materials, including powder and primers, out of reach of children and pets.
- Use personal protective equipment (PPE) such as safety glasses and gloves when handling powders and reloading components.
- Ensure proper ventilation in your working area to avoid inhalation of any dust or fumes.
- Regularly check your equipment for wear and tear to avoid malfunctions.
- Be aware of the specific characteristics and handling requirements of the powders you are using.

## Specific Safety Precautions for Use

- Only use MEC Powder Bushings with compatible reloading presses.
- Verify that the bushing selected corresponds to the desired powder load as indicated in your reloading data.
- Never exceed the recommended powder load for your specific caliber and bullet type.
- Use a reliable scale to measure powder accurately before loading.
- Always doublecheck the bushing in place before starting the reloading process to ensure it is secure.
- Avoid using damaged or worn bushings; replace them immediately.
- Store powder bushings in a cool, dry place when not in use.

## Instructions for Installation and Usage

### 1. Installation of MEC Powder Bushing:

- Ensure your reloading press is turned off and unplugged.
- Remove the existing bushing from the press if applicable.
- Select the correct MEC Powder Bushing based on your reloading data.
- Insert the new bushing into the press, ensuring it fits securely.
- Tighten any locking mechanisms as required to hold the bushing in place.

### 2. Using the MEC Powder Bushing:

- Set your scale to zero before adding powder.
- Use the bushing to dispense the desired amount of powder into your reloading case.
- After dispensing, check the weight of the powder on the scale for accuracy.
- If the weight is not as expected, adjust the bushing or consult your reloading data for further instructions.
- Once the correct load is achieved, proceed with the reloading process according to your specific instructions.

## Disposal Instructions

- Dispose of any damaged or worn powder bushings in accordance with local regulations.
- Do not attempt to reuse or recycle powder bushings that have been subjected to excessive wear or damage.

- Follow local guidelines for the disposal of reloading materials and chemicals.

## **Contact Information for Further Support**

For any inquiries regarding product safety or usage, please refer to the MEC website or contact your local MEC distributor for assistance.

By following these safety instructions, you can ensure a safe and effective reloading experience with MEC Powder Bushings. Thank you for prioritizing safety in your reloading practices.
