

# MEC POWDER BUSHINGS - MEC RELOADING #12A POWDER BUSHING

[Reloading](#) > [Reloading Presses](#) > [Reloading Press Accessories](#)

We stock a variety of the MEC powder bushings. Each bushing holds a unique volume enabling you to adjust the powder load for your rounds. It is always recommended to use a scale to check powder weights for accuracy. We offer individual bushings in #7 thru #13 and #16 thru #38. Please refer to the MEC website for powder charts that will give you a recommended bushing and start point for your specific powder at [www.mcreloaders.com](http://www.mcreloaders.com)

# MEC Powder Bushings Safety Instruction Guide

## Introduction

Thank you for choosing the MEC Powder Bushings. These bushings are designed to help you adjust the powder load for your reloading rounds. To ensure safe and effective use, please read this safety instruction guide carefully. It is important to follow all guidelines and precautions to avoid potential hazards.

## General Safety Guidelines

- Always use a scale to check powder weights for accuracy.
- Ensure you are using the correct bushing for your specific powder type.
- Store powder bushings in a cool, dry place away from direct sunlight.
- Keep all reloading components, including powder and bushings, out of reach of children and pets.
- Regularly inspect your bushings for any signs of wear or damage before use.
- If you notice any defects or irregularities, do not use the bushing and contact your supplier.

## Specific Safety Precautions for Use

- Use only the recommended bushings (#7 thru #13 and #16 thru #38) for your specific reloading needs.
- Avoid overloading your powder bushings, as this can lead to dangerous situations.
- Do not mix different types of powder in the same bushing.
- Handle all reloading components with care to avoid spills or accidents.
- When adjusting powder loads, do so in a wellventilated area to avoid inhaling any dust or fumes.

## Instructions for Installation and Usage

### 1. Selecting the Bushing:

- Refer to the MEC powder charts available on the MEC website to determine the appropriate bushing for your powder type.

### 2. Installing the Bushing:

- Ensure your reloading press is turned off and unplugged.
- Remove any existing bushings from your press.
- Insert the selected MEC powder bushing into the designated slot of your reloading press.
- Secure the bushing according to the manufacturer's instructions.

### 3. Using the Bushing:

- Place your scale on a flat, stable surface.
- Using a clean and dry container, measure the desired amount of powder using the installed bushing.
- Confirm the weight on the scale before proceeding with reloading.
- If adjustments are needed, repeat the measuring process with the appropriate bushing.

### 4. PostUse Care:

- After use, clean the bushing to remove any residue.
- Store the bushing in a safe location, ensuring it is protected from moisture and damage.

## Disposal Instructions

- Dispose of any damaged or worn bushings in accordance with local regulations.
- Do not throw bushings in regular household waste. Check for recycling programs in your area.
- Ensure all powder and reloading materials are disposed of safely and responsibly.

## Contact Information for Further Support

For any safety inquiries or further assistance, please consult the manufacturer's website or your local distributor. It is important to stay informed about product recalls or safety updates.

By following these guidelines, you can help ensure a safe and enjoyable reloading experience with your MEC Powder Bushings. Always prioritize safety and stay informed about best practices in reloading. Thank you for your attention to these important safety instructions.
