

RIFLE - GREY BIRCH SOLUTIONS Foundation Rifle - RDR

Foundation RDR Rifle

The Foundation Red Dot Ready Rifle is a rifle designed specifically for use as a speed/race gun. The ultra-lightweight Foundation RDR utilizes the Foundation chassis, which allows modularity and adjustability to fine-tune your setup. Draw length, cheek height adjustment, optional fore-end lengths and the ability to lock or fold the stock allow the end user to further customize.

The Foundation rifle also utilizes the brand new Fusion Receiver System. In a departure from the traditional V-block design, Grey Birch has developed a threaded receiver and barrel system with the goal of increasing accuracy and consistency of precision in the semi-auto platform. The RDR is the world's first purpose-built receiver that allows the user to mount a red dot directly to the receiver itself without the need for a mount. The Foundation RDR Rifle is compatible with most factory Ruger 10/22™ parts. The Rifle will be sold as fix stock
